Dear Colleague:

Minnesota Gastroenterology, P.A. is excited to announce the opening of a Liver Subspecialty Clinic in Plymouth. Due to the rapidly growing number of patients with hepatitis and other liver disease in the Twin Cities, we are restructuring to provide comprehensive hepatology services in select locations to improve patient access and continuity of care.

The Liver Clinic is staffed by a team of board-certified gastroenterologists who have specific interest and expertise in treating liver disease. Clinic services also are supported by specially mentored nurse practitioners and physician assistants. Because we believe that a collaborative, focused approach can significantly improve the quality and delivery of care, patients referred to us for liver consultation will be scheduled at the Liver Clinic whenever feasible.

In addition to providing state-of-the-art care for your liver patients, we will be able to collaborate more fully in research studies with affiliated academic institutions, such as those which offer tertiary liver services, including transplantation. By centralizing services, we also expect that liver patients will have increased opportunities to participate in clinical research studies when conventional therapies have failed.

We look forward to your suggestions and feedback. As the Plymouth location meets with success, we plan to add a second Liver Clinic at our Maplewood office.

Thank you for trusting Minnesota Gastroenterology, P.A. to care for your patients with liver disease. For more information, or to make a referral to the Liver Subspecialty Clinic, please call 612-871-1145.

Sincerely,

Scott Ketover, M.D.
President

Jeffrey Rank, M.D.
Vice President, Clinical Operations
